

Advanced Hands-on Technical Training \$3000 (\$2500 before September 6)

Includes resort accommodations at Rancho de Los Caballeros in Wickenburg, AZ, meals, activities and all advanced tech training fees with check-in on Monday, October 7 and check-out on Friday, October 11.

What You Can Expect from our Advanced Hands-on Technical Training

The course will center around a number of team based network deployments on the Los Caballeros property. The focus of the Advanced Training will be in network analysis, testing, optimization and troubleshooting. There will be the opportunities for students to participate in both static and mobility focused network deployments.

- **Network Analysis** – Analyzing the current network deployment and functional design
- **Network Testing and Optimization** – Conducting and reviewing a multitude of tests to develop a comprehensive plan for network optimization.
- **Network Troubleshooting** – Troubleshooting realistic network faults as seen in real networks, to include the need for BC Commander Network Snapshot analysis.
