How Oil And Gas Operators Can Reap The Rewards Of Drone Usage

Written by Al Rivero, VP of Global Energy at Rajant Corporation

The midstream market is continually evolving. With the volatility of everchanging oil and gas product prices, it is apparent that operators in this tariff - based business must remain innovative in the ways they adapt to new challenges. The age of Industry 4.0 is here. Focused pipeline operators are finding the best opportunities to maximize efficiency and reliability while minimizing costs and prioritizing safety. As more complex Industrial Internet of Things (IIoT) applications are introduced into the fold, operators must ensure their day-to-day operations and processes can work in symbiosis

with the evolution of these technologies. [Click here](#) to read more in Pipeline Oil & Gas News.

IN THE SPOTLIGHT

Constant Visibility & Communication Essentials

Written by Don Gilbreath, VP of Systems at Rajant Corporation

Whether firefighters are responding to a fire in an urban city or remote village, it's critical that they can access vital voice, data, and video communications while remaining confident that the connection will be available at all times, and in all environments.

This is particularly the case as wildfires continue to grow in the United States and across the globe. According to the National Interagency Fire Centre (NIFC)¹, from 1st January to 2nd November 2019 alone, there were more than 46,700 wildfires across the USA.

GIVING BACK

Rajant Corporation Provides Free Face Masks To Healthcare Workers

In response to the COVID-19 health crisis, Rajant Corporation, has capitalized on its in-house manufacturing and provided essential, protective, free-of-charge face masks to aid the valiant efforts of healthcare workers.

The team of Rajant volunteers, based in Malvern, Pennsylvania, are producing 24 masks a day and will begin shipping completed masks in bulk to those who have expressed interest in receiving the masks. The Rajant team followed the online protocols for [3D Printing of Personal Protective Equipment and Repurposing of Common Household Air Filters](#).

MEET THE TEAM

Sean Buckler Software Engineer

What attracted you to Rajant?

"Our company has a wonderful work culture that I was already aware of before applying. Rajant staff radiates positive energy and an uplifting attitude that I appreciate daily! I'm also thrilled to work for a company with such interesting and powerful networking technology."

What is a typical day like at Rajant?

"My main duties include programming assignments, level 1-3 end-user technical support and database administration, with a particular focus on BreadCrumb analytic and management tools. I was a key player in the creation of BCIAssurance. I also upkeep our support/account processes and help with BCICommander efforts."

What do you like most about your job?

"I get to use my favorite programming technologies daily. I also work with a variety of other engineers that have vastly different skill sets, but I feel a lot of satisfaction when I'm able to work with my coworkers to integrate my work into larger BreadCrumb related projects."

What would you say to someone considering a career at Rajant?

"Although Rajant is growing steadily, we are still a small

company. That means our staff are usually intertwined into many projects and teams at once. If you thrive in a dynamic environment and value a lifetime of learning new skills, you would find our workplace very pleasant."

What do you like to do when you aren't working?

"I try to invest my time in my hobbies whenever possible. When I have a lot of mental energy to spare, I enjoy completing various Udemy programming courses to keep up to date with the latest technologies."

Any hobbies or hidden talents?

"In high school, I won a couple of state level marksmanship competitions without having much prior experience. Going to the range is still one of my favorite pastimes. I also enjoy making small independent games for mobile devices. I enjoy singing, but would be ecstatic if I could actually sing well!"

What is the best advice you have ever heard?

"You don't have to know everything, just enough to be useful, to get stuff done. Don't burn yourself out."

WHAT: [ENTELEC Conference & Expo](#)

WHEN: August 11-13, 2020

WHERE: George R. Brown Convention Center – Hall B3, Houston, TX (Booth #419)

The annual ENTELEC Conference & Expo brings together industry professionals, exhibitors, and vendors to continue sharing knowledge and educating each other about the latest developments in energy, telecommunications, and oil & gas. The ENTELEC Conference provides a platform for the exchange of ideas and provides a resource for industry challenges and is designed to help achieve the following goals: improve team efficiencies, lower company costs, and maximize productivity. In attending be sure to visit the Exhibit Hall and stop by and visit with Rajant at Booth #419 and discuss what's the latest and greatest from our company. Hope to see you there!
