Our monthly newsletter keeps you updated on the latest innovation and happenings at Rajant and in the industries we serve.

## IN THE SPOTLIGHT

### Rajant Announces Michael Griffin, Lisa Porter, and Daniel Verwiel as Strategic Advisors to Support Technology and Market Direction

On Monday, Rajant announced that Michael Griffin, Lisa Porter, and Daniel Verwiel (pictured above left to right) will be strategic advisors and provide consultancy regarding Rajant's future technology and market opportunities. Their backgrounds will enable them to impart a wealth of knowledge and experience from the civil, defense, and commercial sectors to inform research, development, and go-to-market direction for Rajant. Earlier this year, Michael Griffin and Lisa Porter left their positions as the Under- and Deputy Under Secretary of Defense for Research and Engineering, where they shared

responsibility for research, development, and prototyping activities within the Department of Defense. They are now the Co-Founders and Co-Presidents of LogiQ, Inc., a company providing high-end management, scientific, and technical consulting services...

## HAVE YOU READ?

### Surveying the Scope

*The business case for employing drones and UAVs has strengthened with the onset of COVID-19*

The emergence of drones and unmanned autonomous vehicles (UAVs) in the mining space is part of a much broader movement to remove personnel from the most hazardous areas of operations. Whether it is autonomous haulage, loading or refueling, the ability for machines to carry out manual tasks without operator involvement is improving productivity, safety, and – in many cases – profitability...

## MILITARY MOMENTS

### Deploying Mission Critical Communications

*Rajant continues to transform and reinvigorate the military sector*

Q&A's with Soldier Modernisation and Michael J. Van Rassen, President, Military & Government Markets for Rajant.

**Q:** Soldier Modernisation has been talking about the digital battlefield hitherto, the increase in technology for the modern warfighter, and the need for always-on data transfer. Are there recurring problems that you find when looking at the deployment of new systems?

**A:** As the battlefield has digitized, the recurring problem is one of frequency management and deconfliction. This is not only an enemy jamming a signal...

MEET THE TEAM

Scott Farabaugh  
Accountant

Where did you work before Rajant and what attracted you to Rajant?

Prior to Rajant, I worked for Arraya Solutions, an IT solutions company in Blue Bell. I was initially attracted to the innovation of Rajant

and its ability to be of such great use to a wide variety of consumers.

What is a typical day like for you at Rajant?

I work in the Finance Department and I am responsible for processing purchases, expenses, AP, bank reconciliations, and a variety of other things. I would say that I don't have a typical day and that is one of the many things I enjoy about working at Rajant. It keeps me on my toes!

What do you like most about your job?

The culture is top-notch and management supports learning on the job and rewarding hard work.

If you could pick up a new skill in an instant, what would it be and why?

If I could pick up a skill in an instant, it would be the ability to play the piano. I find great joy in music and the piano produces such beautiful harmonies and melodies.

Who is someone you really admire and why?

My mother. She was my first friend and mentor and has always had faith in me. She is always by my side, through thick and thin. She has made many sacrifices for me that I am forever grateful for.

What do you like to do when you aren't working?

I enjoy spending time with my family. My son, Karter, recently turned one and keeps me occupied. I am a sports enthusiast and love to keep active by going to the gym and playing sports. I also enjoy traveling and spending time outdoors.

What is the best advice you've ever heard?

Don't dwell on the past, and don't daydream about the future, but concentrate on showing up fully in the present moment.

Looking back, what advice would you give to yourself at a younger age?

Everything happens for a reason. Without mistakes and failure, you would have never learned. Nobody is perfect so don't dwell on disappointments or view unfortunate events as regrets. But rather, see them as opportunities in disguise.

2020 Rajant Partner Summit  
& Charity Golf Tournament

Rancho de los Caballeros
