Keep Up with Current Trends and Rajant Innovation

Our quarterly newsletter keeps you updated on the latest innovation and happenings at Rajant and in the industries we serve.

NOT TO BE MISSED

Rajant Kinetic Mesh® Radio Kit for Boston Dynamics Enabling Continuous Mobile M2M Connectivity Anywhere

Autonomous systems and robotics are becoming operational necessities. Robots, like Boston Dynamics' Spot, are being used more and more for working in environments that might not be suitable for humans. To keep Spot going anywhere, any time, and under any condition, Rajant enables continuous on-the-move connectivity for machine-to-machine (M2M) communications.

Acubis Technologies Delivers Australia's First Rajant Peregrine & Hawk Utilities and Mining Solution

A government-owned utilities provider in southwest Queensland Stanwell was battling the ever-evolving data and application requirements of their operational technology (OT) network. This OT network supports an array of site-wide systems and devices. They include CCTV, access control, environmental systems (noise blast and vibration), in-vehicle fleet management, fatigue management, digital fire alarm systems, manufacturing executing systems (MES), mining operational data warehouse, and industrial IoT edge devices.

TIME TO RECOGNIZE

2022 Partner Summit

The 2022 Rajant Partner Summit was recently held at the Rancho de los Caballeros in Wickenburg, Arizona. The summit included educational sessions, a technology showcase, various networking opportunities, and a charity golf tournament to support veterans. Wonderful to be together, and we welcome everyone to join us next year from around the world.

MEET THE TEAM

Gizzy O'Toole

Event Marketing Director

Where did you work before Rajant?

Prior to Rajant, my career was almost exclusively in the music industry. Working for musical instrument manufacturers and brands, including Hohner Harmonicas and Accordions, Sonor Drums, Ibanez Guitars, Tama Drums, and Hercules Stands.

What attracted you to Rajant?

The challenge and excitement of entering a new industry brought me to Rajant. To continue to help and create a connection with people just in a different way is impactful. Plus, the opportunity to be part of a thriving work culture is difficult to find and could not be passed up!

What do you do at Rajant?

As a member of the marketing team, there are no typical days, but my weeks are mainly comprised of preparing for and putting on a variety of trade shows and events for our diverse markets in collaboration with sales, our partner network, and the rest of the marketing team. From there, it is a mix of organizing event timelines, show paperwork, graphics, content creation, and arranging staff, gear, booth, and promotional logistics for our external and internal events and activities. Continuously, I build and maintain a network of vendors, brand partners, industry connections, and non-industry contacts. Then finally, securing sponsorship activities that enhance our presence to form an experience that best amplifies our brand, educates new prospects, and ultimately drives leads is my focus.

What do you like most about your job?

My job is all about connecting with people so getting to work with colleagues from all over the world with diverse backgrounds is always exciting. That and it helps being surrounded by really smart people like scientists, engineers, and creatives. It is that core factor that motivates me to bring my best to the table every day for the team.

What do you like to do when you are not working?

You will find me most often camping with my wife and two kids, at the beach (in spite of my Irishness), fixing up our house, playing some chess, guitar, or some other instrument. If I'm not in one of those places, I'm probably thrifting for records or antique gems and cutting deals. Also, aviation, road trips, octopuses and books are really cool.

What is the best advice you've ever heard?

Attitude is a little thing that makes a big difference.

WHERE NEXT?

WHAT: Queensland Mining & Engineering Exhibition 2022

WHEN: July 19-21, 2022

WHERE: Mackay, Australia

WITH: Acubis Technologies and Madison Technologies
