Keep Up with Current Trends and Rajant Innovation

Our quarterly newsletter keeps you updated on the latest innovation and happenings at Rajant and in the industries we serve.

RAJANT KINETIC MESH IN ACTION

Rajant Case Study: MiningTag Chile Achieves Livestreaming In-Motion Video for Forestry

South American company MiningTag Chile partnered with Rajant to conduct semi-autonomous operations in a dense forest environment. MiningTag needed live, self-sufficient cameras, a wireless network to support this, and integration services to make the system functional. Rajant's field-proven Kinetic Mesh network was utilized to make possible the daunting project.

RURAL BROADBAND

Rural Broadband Video

Wireless broadband has become a necessary part of everyone's life. Transformative as water and electricity to the vibrancy of daily living, businesses, governments, schools, and households cannot function in a "digital desert" without the Internet. Hear how collaboration and understanding can drive connectivity to underserved and unserved areas of the United States' Appalachian Region.

MEET THE TEAM

Steven Griggs Vice President, Sales Engineering

What attracted you to Rajant?

It was the technology and the culture. When I first came to Rajant 16 years ago in 2007, InstaMesh was unlike anything ever imagined in the industrial networking space. From the moment Paul Hellhake started talking to me about

the technology, I was hooked. Bob Schena brings a family-like culture to the company making Rajant the best place to work.

What is a typical day like for you at Rajant?

That's one of the things I love about my job. It's never the same thing day to day or week to week. I manage the Sales Engineering Team, monitor projects, provide technical support for our partners, assist helpdesk personnel with customer interactions, travel for customer meetings, and provide technical field support and technical training.

What do you like most about your job?

I love being a part of the SE Team—their technical knowledge and ability to get things done is a testament to Rajant's culture.

What would you say to someone considering a career at Rajant?

It will be the best job you've ever had.

What do you like to do when you aren't working?

My three hobbies are playing music, golf, and cooking.

What is your proudest accomplishment?

Aside from being a husband and father of 6, I am working on what I hope will be a very proud accomplishment. I'm currently two years into a five-year Systematic Theology Master's Program at The Immaculate Conception Seminary School of Theology/Seton Hall. The culmination of which, God willing, I could be ordained a Deacon in the Catholic Church.

Who is someone you admire and why?

It is my father. He's remarkable in how he loves his family. He's not afraid to tell you the truth, even when it's something you may not want to hear—but he'll find a loving way to do that and help you see the truth of his wisdom. He has this way of just knowing what you need and always makes one feel like they are the most important person to him. He taught me how to be the father I wanted to be for my kids. He loves my mom with all he is. Being in the presence of that is truly inspiring.

Can you play any instruments?

Yes, I play the bass guitar, and I sing. Occasionally, I get to play with Brad, our Hardware Manager at Rajant. He plays all the time. I aspire to join him in a few gigs when I get the time.

UPCOMING TRAINING

2023 RCNP Training- Toronto, Canada

Hurry Up! Registration ends January 6th for Rajant's Certified Network Professional Training Class. Learn from the Experts. Gain hands-on experience with our Kinetic Mesh® networking solutions. Prior RCNA certification required. Individuals that have earned the RCNP qualification are certified to be knowledgeable on the more advanced aspects of Rajant Kinetic Mesh pertaining to Planning, Configuration, Mesh Verification, and Monitoring.
