Rajant Celebrates 20 Years of Serving the Military

This year marks the 20th anniversary of **Rajant's partnership with the military**. Twenty years ago, Rajant worked to develop a radio that could be used in the Counter Rocket Artillery Mortar (C-RAM) Program to defend servicemembers, government officials, and civilian contractors from Indirect Fire (IDF) attacks by insurgent forces. Because of its success, Rajant became the primary radio for the Counter Unmanned Aerial Systems (CUAS) efforts to deal with an exponential increase in drone threats. Rajant continues to deliver a "Combat Proven Solution" to protect all deployed service members.

MEET THE TEAM

Teresa DelCampo
Executive Assistant

Where did you work before Rajant?

Prior to my employment here, I worked for the Pennsylvania State Senate and House of Representatives.

What attracted you to Rajant?

I was originally attracted to Rajant due to their expansive innovation in their products. I was and still am fascinated with the equipment made.

What do you do at Rajant? What is a typical day like?

I manage Bob's schedule, which includes a large amount of travel. I also assist with office parties and typical day-to-day operations. I enjoy the spontaneity of my job. Also, Rajant is full of wonderful people.

What do you like to do when you aren't working?

I love spending time with my family. I am a wife, mother of three, and sister of four. We spend a lot of time boating on the Chesapeake Bay. Also, I enjoy working out, cooking and cross stitching.

Any hobbies or hidden talents?

My favorite hobby is gardening. I plant a vegetable garden in the spring and enjoy vegetables all summer long. I also can homemade tomato sauce, jam, and pickles.

What's the best piece of advice you've ever heard?

The best advice I ever received was from my Great Aunt Katherine. She used to speak of a proverb, "Believe your beliefs and doubt your doubts but never believe your doubts and doubt your beliefs."

Looking back, what advice would you give to yourself at a younger age?

If I could give my younger self advice, I would tell my younger self to learn more about my grandparents. Ask them questions, spend more time with them, and listen to the lessons they've learned. Time is fleeting, and I would give anything to have more time with them.

If you could pick up a new skill in an instant, what would it be and why?

I would love to learn how to play an instrument. I believe it would be a relaxing hobby to be able to jam out!
