

# sTrip

## Smart Sunflower Bracelet

sTrip is wearable device that allows contact tracing and facilitates distancing at workplace.

Each device interacts with the others, through BLE technology identifies distance from the different devices in the whereabouts and eventually proceed with the alarm procedure (light and/or vibration).

sTrip is specific for public environments, indoor or outdoor, which need to analyze workers interaction and guarantee safety.

### IoT WEARABLE DEVICES

Product Features	
<b>Product Code</b>	WL007-00W2
<b>User Interface - alarm and battery</b>	Led, vibrating
<b>Alarm settings</b>	Detection from 0.5mt to 2.5mt - Alarm time
<b>Power Supply - Battery</b>	Battery pack 3.7V 80mAh rechargeable
<b>Communication</b>	Bluetooth 5.0
<b>Antenna</b>	On board antenna
<b>NFC</b>	Optional
<b>Battery</b>	Rechargeable lithuim polymer battery
<b>Operating Temperature</b>	-40°C to +70°C
<b>Protection</b>	IP67
<b>Size and weight</b>	40.89 x 20.18 x 12mm; Range: 13-21mm
<b>Warranty</b>	1 year (battery excluded)
<b>Certifications</b>	CE, FCC
