

skyact.Button

Battery powered BLE push button

skyact.Button is a mini device used to give wireless commands to the lighting device controllers.

The device is battery powered, assures ultra-low power consumption and extra long standby time and can be equipped with different communication protocol such as Bluetooth, ZigBee, Zwave, RF.

IoT ACTUATORS

Product Features	
Product Code	50.10003.004
Working Voltage	3VDC (1PCS CR2032 button battery)
Communication Protocol	433MHZ / 868.4MHZ / Bluetooth / ZWAVE /ZigBee
Communication Distance	100m (open area)
Static Current	≤ 1 uA
Transmission Current	≤ 12 mA
Output Signal Types	Trigger report, battery level status report
Operating Humidity & Temperature	-20°C ~ 60°C; ≤95%RH no condensation
Size	70x43x18 mm
Warranty	1 year
