

Rajant BreadCrumbs®

Powerful Functionality in a Compact Form

Rajant's Kinetic Mesh® network is unlike any other wireless mesh system on the market today, providing fully mobile broadband connectivity that is simple, instantaneous, and fault-tolerant for any application.

The network's power lies in Rajant's wireless BreadCrumbs: the compact, lightweight, industrial-grade nodes that form this agile, adaptable wireless infrastructure.

BreadCrumbs have unique capabilities that enable them to perform flawlessly in even the most hard-to-network environments and make them ideal for deployment across ever-moving operations.

Peer-to-Peer Functionality

Every Rajant BreadCrumb can hold multiple simultaneous connections, over multiple frequencies, with other nodes in the mesh, eliminating the need for a controller node while adding network reliability.

Self-Optimize without Intervention

InstaMesh enables the nodes to adapt in real-time to quickly or constantly moving network elements. No connections have to be broken for new ones to be made, providing for resilient mobility.

Deployable as Fixed or Mobile Nodes

Compact, lightweight BreadCrumbs can be affixed to static equipment or deployed directly on moving assets – so machines and personnel can take connectivity with them wherever they go.

Support Seamlessly Scalability

If new BreadCrumbs are added, they automatically begin meshing with neighboring nodes and further strengthen the network by providing additional paths to send traffic.

Infused with InstaMesh® Intelligence

All BreadCrumbs have Rajant's patented InstaMesh networking software onboard, which dynamically evaluates and directs traffic via the best available path(s) at any given moment.

Perform in Extreme Conditions

The industrial-strength design of the nodes, coupled with IP67-rated dust-tight and water-tight enclosures for most models, allow them to operate continuously in virtually any environment for years.

BreadCrumbs can easily integrate with and enhance existing network infrastructure, including third-party satellite, wired, point-to-point wireless, point-to-multipoint wireless, or can be deployed ad hoc to bring connectivity where no communications infrastructure yet exists.

Rajant BreadCrumb® Portfolio

Find the Right Radio for the Right Function.
Use the chart below to compare the features and functionality of our wireless BreadCrumb offerings.

Core BreadCrumb					
   					
	Model	Cowbell	Peregrine LTE	Peregrine Licensed	Peregrine Core
Key Features	Install Area / Attachment	Infrastructure, heavy equipment	Infrastructure, heavy equipment	Infrastructure, mobile equipment	Infrastructure, heavy equipment
	Ideal Applications / Tagline	Distributed computing hub and Platform-as-a-Service to SIMPLIFY the delivery and management of AI solutions at the edge.	Hybrid network to extend LTE networks. Great for harsh environments with high shock and vibrate.	Licensed frequencies for defense / military.	Highly ruggedized for use in harsh environments with high shock and vibration, and autonomous operation.
Radio	Max TX Power	25 dBm	30 dBm, up to 25 dBm LTE	32 dBm	30 dBm
	Radio Configuration	Dual 2x2 MIMO	"Triple 2x2 MIMO 3 Wi-Fi, Single 2x2 MIMO LTE"	Quad 2x2 MIMO or Triple 3x3 MIMO	Quad 2x2 MIMO
	Radio Type	Up to 802.11ac Wave 2	Up to 802.11ac	Up to 802.11ac	Up to 802.11ac
	Max Channel Size (MHz)	80 MHz	80 MHz	80 MHz	80 MHz
	Combined Data Rate (Mbps)	1730 Mbps	2600 Mbps	2300 Mbps	2300 Mbps
	Radio Count	2	4	4	4
	Antenna Ports	4	8	9 or 8	8
	Frequencies Supported	2.4, 5 GHz	2.4, 5 GHz	Custom Frequencies	2.4, 5 GHz
Interface	Ethernet spec	1 of GbE	2 of GbE	2 of GbE	2 of GbE
	USB Ports	1	1	1	1
	Connector Interfaces	RJ45, USB	M12, USB Type A	M12, USB Type A	M12, USB Type A
	DC power connection	1	1	1	1
Power	Input Voltage	10-58VDC	"20-60VDC (DC input) 38-60VDC (Passive PoE)"	"20-60VDC (DC input) 38-60VDC (Passive PoE)"	"20-60VDC (DC input) 38-60VDC (Passive PoE)"
	Power Consumption (idle/peak)	4.2W/14.4W	10W/34W	10W/35W	10W/34W
	Power Input	Passive PoE	"2 of PoE++, Passive PoE 1 of DC input"	"2 of PoE++, Passive PoE 1 of DC input"	"2 of PoE++, Passive PoE 1 of DC input"
Physical	Operating Temperature (with heater if available)	-40°to60°C	-40°to70°C	-40°to70°C	-40°to70°C
	Dimensions	14 X 14"	264.9 x 253.7 x 46.2 mm (10.43 x 9.99 x 1.82 in)	264.9 x 253.7 x 46.2 mm (10.43 x 9.99 x 1.82 in)	264.9 x 253.7 x 46.2 mm (10.43 x 9.99 x 1.82 in)
	Weight	0	2946 g (6 lbs 7.9 oz)	2946 g (6 lbs 7.9 oz)	2946 g (6 lbs 7.9 oz)

BreadCrumb Benefits: Network Infrastructure for Today's Interconnected, Mobile World

Rajant BreadCrumb nodes are purpose-built to reliably enable voice, video, and data communications instantly and without fail almost anywhere. They readily form a fully redundant web of meshed connections to deliver more reliability, mobility, and resiliency using less infrastructure than other wireless networking options like Wi-Fi or LTE.

Rajant BreadCrumbs have been proven in the field for two decades to deliver on the promises of:

- **Robust fault tolerance:** no single point of failure & ability to work around interference
- **High bandwidth and low latency:** nodes have hundreds of potential paths to direct traffic
- **Total, 'never-break' mobility:** enables M2M communications, autonomy, and more
- **Cost-effective network scalability:** requires minimal technical resources to manage and expand
- **Military-grade network security:** every node has multiple cryptographic options

Not sure what
BreadCrumb
is best for your
application?

We're ready to help you further assess your network requirements and will recommend the appropriate solution for your needs.
