

sKy.Door

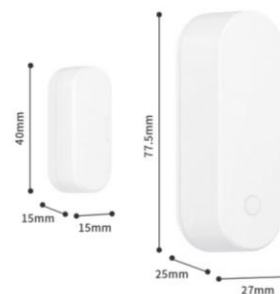

BLE Door Sensor

Bluetooth door sensor designed for a reliable door and window monitoring. With its data logging and real-time alerts, the door sensor detects openings and closings with precision. Using BLE technology, the device wirelessly transmits status updates, it is easy to install and ensures an operational lifespan of over 8 years through a 2600mAh battery.

Features

- Automate scene triggering based on door status change
- 3-axis sensor & hall sensor
- 100m broadcast coverage
- Replaceable battery - 2600mAh 1*ER14505

IoT Sensors

Product Features

Product Code	50.100001.021
Chipset	Nordic nRF52 series SoC
Connectivity	BLE 4.2
Dimensions	77.5*27.0*24.7 (Body) 40.0*16.0*15.0 (Magnet)
Color	White
Material	PC
Weight	30 gr
Sensor	Hall effect sensor
Detection threshold	25mm (1 inch)
Battery Capacity	2600mAh Replaceable battery
Battery Lifespan	8 years (at a 1000ms ADV interval 0 dBm Tx Power)
Operating Temperature	-20°C ~ 60°C
Waterproof	IPX4
Transmission range	100m
Installation	3M sticker Holder with screw
Warranty	1 year
